Gregory Charles Ditzler

Contact Information

3141 Chestnut St., Bossone 325
Department of Electrical & Computer Engineering
Drexel University
Philadelphia, PA 19104 USA

Phone (717) 679 – 2289
E-mail gregory.ditzler@gmail.com
Web http://sites.google.com/site/gregditzler
DOB 13-Nov-1985

Research Interests

pattern recognition algorithms, multiple classifier systems, incremental/online learning, concept drift, class imbalance, data mining, stream mining, machine learning

Education

PhD **Drexel University (2011 – Present)**
Electrical & Computer Engineering
Thesis advisor: Gail Rosen, Ph.D., and Robi Polikar, Ph.D.
Research areas: machine learning in metagenomics

MSc **Rowan University (2009 – 2011)**
Electrical & Computer Engineering
Thesis area: *Incremental learning of concept drift from imbalanced data*
Thesis advisor: Robi Polikar, Ph.D.

BSc **Pennsylvania College of Technology (2004 – 2008)**
Electronics Engineering Technology
Minor: Mathematics
Graduation Project: *PowerPC and MicroBlaze applications on the Xilinx Virtex-II Pro*

Appointments

Teaching Assistant **Sept. 2011 – Present**
Graduate Research Assistant **June 2011 – Present**
Drexel University, Dept. of Electrical & Computer Engineering Philadelphia, PA

- *As a teaching assistant*, I worked in several sections teaching linear algebra (ENGR231), introduction/advanced digital signal processing (ECES352 / 435), and signals, systems & transforms (ECES302).
- *As a research assistant*, I work with Dr. Gail Rosen in the Ecological & Evolutionary Signal Processing and Informatics Laboratory (EESI). I research machine learning approaches in the field of metagenomics. Some recent work focuses on deep learning methods for metagenomic samples, identifying variable importance using a Neyman-Pearson test, and online learning with multiple experts for large volume data streams.

Graduate Research Assistant **May 2009 – July 2011**
Adjunct Professor **Sept. 2010 – Dec. 2010**
Rowan University, Dept. of Electrical & Computer Engineering Glassboro, NJ

- *As a research assistant*, I worked with Dr. Robi Polikar in the Signal Processing & Pattern Recognition Laboratory (SPPRL) where I researched methods for learning class imbalance in the presence of concept drift. I have been involved with other projects on speaker identification and multi-objective optimization.
- *As an adjunct professor*, I taught a sophomore level AC circuit analysis course. Topics included: Laplace transforms, phasors, three-phase, transient response, forced response, and analog filter design.

Electronics Systems Engineer **May 2008 – May 2009**
Electronics Systems Intern **March 2007 – May 2008**
QorTek Inc. Williamsport, PA

- *As an engineer*, I worked on SBIR contracts involving piezoelectric sensor design and signal acquisition. I designed class-*D* amplifiers for piezoelectric and magnetostrictive loads. Responsibilities included: writing SBIR proposals, writing project reports for PI(s), collaborating with contractors to meet deadlines.
- *As an intern*, I programmed various FPGAs using Verilog HDL and microcontollers in C. Worked with experienced engineers for designing circuit boards for amplifiers, signal conditioning circuits, and debug circuits/code.

Miscellaneous Experience

Programming Languages: Matlab, Java, Python, Bash, C, C#, LabVIEW, Lua, Verilog HDL, VHDL, Perl, and R.
Hardware Programming: Xilinx FPGAs, TI DSPs, microcontrollers (HC12, Silicon Labs, Microchip), Microchip DSPics, Actel FPGAs
General Software: Matlab, Eclipse IDE, Xilinx Platform Studio, LabVIEW, Cadsoft EAGLE, Visual Studio, Actel Libero IDE
Relevant Coursework: Digital Image/Signal Processing, Pattern Recognition & Machine Learning, Calculus (I, II, III), Ordinary & Partial Differential Equations, Optimization Theory, Speech Processing, Smart Sensors, Probability Theory, Detection & Estimation Theory, Stochastic Processes, and Bioinformatics
Projects: concept drift & class imbalance in incremental learning scenarios, classifier fusion methods for robust speaker identification systems, classifier parameter optimization using genetic algorithms, automated trabecular bone segmentation in CT images, forensic identification using metagenomic samples, integration of feature selection methods into KBase services, deep learning methods for recovering structure in microbial communities.
Other: Linux/Mac/Windows operating systems, LaTeX, Weka, MOA, QIIME, Torch7, Theano

Teaching Experience

Summer (Su), Spring (Sp), Fall (F), Winter (W)

Course ID	Course Title	Teaching Role	Date(s) Taught	University
ECES302	Signals, Systems & Transforms	Teaching Assistant	Sp–2012, F–2012	Drexel University
ECES352	Introduction to Digital Signal Processing	Teaching Assistant	Su–2012, W–2013	Drexel University
ENGR231	Linear Engineering Systems	Teaching Assistant	F–2011	Drexel University
ECES435	Advanced Digital Signal Processing	Teaching Assistant	W–2012	Drexel University
ECE09202	Networks II	Adjunct Professor	F–2010	Rowan University

Publications

Book Chapters

2. **G. Ditzler**, Y. Lan, J.-L. Bouchot, and G. Rosen, "Feature selection for metagenomic data analysis," *Encyclopedia of Metagenomics*, 2014, To appear.
1. C. Alippi, G. Boracchi, **G. Ditzler**, R. Polikar, and M. Roveri, "Adaptive Classifiers for Nonstationary Environments," *Contemporary Issues in Systems Science and Engineering*, IEEE/Wiley Press Book Series, 2013, To appear.

Journals

1. **G. Ditzler** and R. Polikar, "Incremental learning of concept drift from streaming imbalanced data," in *IEEE Transactions on Knowledge and Data Engineering*, accepted, 2012.

Peer Reviewed Conference/Workshop Publications

Activities

Journal Reviewer

BMC Bioinformatics	2012
IEEE Transactions on Systems, Man, and Cybernetics: Part B	2013
IEEE Transactions on Neural Networks and Learning Systems	2012/3
Springer Neural Computing & Applications Journal	2012
Springer Neural Processing Letters Journal	2012
Springer Pattern Analysis & Applications Journal	2012

Conference Reviewer

Artificial Intelligence Applications and Innovations Conference	2013
IEEE International Joint Conference on Neural Networks	2011-13
IEEE International Symposium of Circuits & Systems	2011
IEEE Symposium on Computational Intelligence in Dynamic & Uncertain Environments	2013
International Workshop on Learning Strategies and Data Processing in Nonstationary Environments	2013

Technical Program Committee

IEEE Symposium on Computational Intelligence in Dynamic & Uncertain Environments	2013

Service

Drexel IEEE Graduate Forum Vice President	2013/14
IEEE Region 2 Student Activities Conference Planning Committee	2008
Penn College IEEE Branch Vice Chair	2007/8

Awards/Honors

1. Nihat Bilgutay Fellowship, 2013
2. Koerner Family Award, 2013
3. DTRA/NSF Algorithms Workshop Travel Grant, 2012
4. Graduate Research and Teaching Fellowship, Drexel University, 2011/12
5. Student Travel Award for the IJCNN, National Science Foundation, 2011
6. Graduate Research Achievement Award[1], Rowan University, 2011
7. Graduate Research Assistantship, Rowan University, 2009
8. Award for Outstanding Leadership & Service to the Pennsylvania College of Technology IEEE Branch, 2007/8
9. Penn College Award for Leadership to the College and Community, 2008
